

## **IONIZED WATER FOR HEALTH AND HEALING**

***Not all water filters and purifiers are created equal.*** For over 3 decades a superior water purification technology has been transforming the health of its users and gaining popularity throughout the world. Due to advances in technology and production, Ionized water machines that produce active hydrogen water are becoming more affordable and more effective than ever before. Ionized water systems, which were previously only available to the very wealthy, are now priced within reach and available to the US market.

***Water ionizers may be the most important water and health enhancement product available today.*** What I am referring to is a family of water purification machines manufactured and perfected for over 25 years by a company called Jupiter Science. These are not ordinary water machines, water filters, reverse osmosis or distillation. They are ion water machines utilizing electrolysis, which separates the acid and alkaline minerals in the water and then passes it through a special combination of filtering media that charges the water with electrons while filtering it down to .01 Microns. These machines produce pure, energized, living water at the precise pH level that your body needs. You can choose from highly acid water to highly alkaline water, depending on how you want to use the water.

***For drinking purposes, highly alkalized water has been shown to have numerous health benefits.*** In addition to being able to create highly alkaline water is also the fact that the water has been charged with ions or electrons, which creates a living, active water that is equivalent to an antioxidant or free radical scavenger. This antioxidant water is sometimes referred to as Active Hydrogen water. The ionization process results in an almost magical or alchemical separation of elements in the medium of water. Water is the universal solvent and the ultimate hydrator, especially when the molecules are reduced (as they are with the Jupiter Ionizers) to microclusters for better assimilation and bioavailability to the cells.

***4 Articles are Presented Below to Help You Further Determine the Validity and Performance of Ionized Water Machines.***

# **The 12 Benefits of Ionized Water Not Found Elsewhere:**

## ***Possibly the Most Important Health Advance of the 21st Century***

Written by Blake Sawyer

### **There are two things to remember when it comes to water:**

(1) it's the most important substance to all life on this planet and (2) our bodies are made up of more than 70% water.

Distilled, reverse osmosis, spring, bottled, tap and mineral are all water. But is all water the same or even similar? Is one better than another? Volumes have been written on the subject. But the facts are facts. And the truth is what sets you free, not incomplete information or deadly deceptions.

Ionized water is different than any of the aforementioned waters. ***It has twelve different properties to it that no other water (save glacier milk) has.***

### **Here are a few differences:**

1) Ionized water is hexagonally shaped (like a snowflake). It is considered to be the healthiest water in the world to drink. On the other hand, pentagonally shaped water (as an example distilled water is 97% pentagonally shaped) is dead water. Placed any fish, plankton, or algae in pentagonally shaped water and they quickly die.

2) Ionized water is structured water with hydrogen bonding. All biomechanical processes of the human body function at the cellular level. It is the hydrogen bonding of structured water that provides the greatest support for these vital processes.

3) Ionized water is living water. All electrons in water either spin to the left or the right. High speed of the left spin of electrons is considered to substantiate that the water is vital and alive. Only ionized water has this quality.

4) Ionized water is the only water that has a low surface tension. Surface tension is measured in dynes. This allows for greater absorption of water and nutrients into the body.

5) Ionized water has a very alkaline pH. It can be from 100 to thousands times more alkaline than all the aforementioned waters. Alkaline water removes acidosis from the body, the environment in which all diseases swell, as well as the cause of most diseases.

6) Ionized water has Super Conductive properties. Only ionized water holds an electrical charge. This is what gives water its vitality.

7) Ionized water is in clusters of 4 to 6 H<sub>2</sub>O molecules. Nuclear Magnetic Resonance has shown that this is one third that of other waters, which has clusters of 10 to 15 molecules. This cluster reduction helps cells absorb ionized water quickly and efficiently.

8) Ionized water is 'pure' or 'virgin' water. Everything water has been exposed to leaves an electromagnetic frequency signature or imprint. Negative frequencies are associated with diseases like cancer. Ionized water is virgin water because the EMF has been 'reset'.

9) Ionized water has millions of hydroxyl ions per glass. No other water has this incredible benefit. Hydroxyl ions 'neutralize' cancer causing and destructive free radicals in the body.

10) Ionized water oxygenates the body via an increase in the Oxygen/Hydrogen angle. All other water is void of this benefit.

11) Ionized water has positive polarity. Almost all other waters are negative in their polarity. Only positive polarity water can efficiently flush out toxins and poisons in the body at the cellular level.

12) Ionized water is highly positive charged. This allows the cells to efficiently transmit photons to each other. This allows productive vital cell-to-cell communication. Ionized water is thousands times more healthful to your body than any other water. The proof "is in the pudding" so to speak. Everyone who drinks ionized water, either in it's natural state as glacier milk, or from a properly built and functioning water ionizer, lives in a state of health light years beyond those that don't.

Did you know that average life expectancy of those that exclusively drink glacier milk is over 110 years of age? And the 15% of the population of Japan that drinks ionized water from water ionizers have a 10 plus year longer life expectancy than those in the United States? And they have been drinking the ionized water for an average of only 12 years! Just think if they would have started drinking ionized water from birth! They would live to be 120 or more!

- One glass of Ionized water can hydrate you body better than gallons of any other water.
- Ionized water can alkalize your body better than the only other method (eating a 100% organic and raw vegetarian diet).
- Ionized water removes damaging free radicals from you body more efficiently than consuming bottles of vitamin C!
- Ionized water oxygenates your body more effectively than any other 'oxygen' therapy.

- Ionized water can flush toxins and poisons out of your body better and with considerably less negative effects than any other detox program/protocol.
- Cancer, obesity, high blood pressure, diabetes, arthritis, kidney/renal disease, cardiovascular disease, ad infinitum, are all slowed, stopped, and in most circumstances reversed when drinking ionized water.

## **A Naturopath's Experience with Ionized water and dark Field Microscopy**

Sue Pollock is the principal of Ballina Naturopathy and an Ion Life water user. This is a letter we received from her.

A Man in his late 40s presented to my clinic with chronic headaches. Had been seeing his doctor and chiropractor with no changes in his symptoms. On Live Blood examination using a microscope we found he had lots of chemical and uric acid crystals (works on a farm), as well as massive platelet clusters (clotting factors).

After discussing his water source (rain water with chemical drift), he decided it could be beneficial to purchase and use the ionized water from a Jupiter System. He was also prescribed supplements to reduce his platelet size and numbers, feeling this build up could be causing his headaches (blood vessels to head restrict flow). I normally check the blood after 3 mths, but in this case, because I referred him back to a GP, we wanted to look at his blood before the visit, only eight days after the initial examination and only four days after being on the water.

I did not expect to see much change, as normally the supplements take a few months to show radical improvement, but hoped to see a slight shift to show we were on the right track.

Well, we were both amazed, as his blood looked great. All crystals were gone and platelets had reduced to completely normal size and number. He also said that since drinking the alkaline water he had more energy and he'd only had one headache which was before he started the water. (He was having major headaches every second day and dull headaches the other days). He feels the results were to do with drinking the water and I tend to agree as the supplements as great as they are don't usually work that fast. I am glad I'm drinking the water too."

Sue Pollock

## **Research from Japan with Ion Water Generators & Hydrogen-Rich Water**

The Ministry of Health and Welfare in Japan has officially recognized (October 19th, 1992) that the intake of hydrogen-rich water (alkaline water/ active hydrogen water), as produced by "Active Hydrogen Water Generator is efficacious for the following conditions:

- chronic diarrhea
- indigestion
- gastrointestinal aberrant fermentation
- antacid and
- hypercyliaic conditions

### ***CLINICAL TEST DATA FROM DR. KAWAMURA IN JAPAN:***

Dr. Kawamura of Kyowa Medical Clinic, Kobe, Japan (a clinician who has been conducting clinical tests by having his patients drink active hydrogen water for over 20 years in his hospital). He has had good results for many of his patients with diseases such as diabetes, atopy and cancer.

### **CLINICAL IMPROVEMENTS OBTAINED FROM THE INTAKE OF REDUCED WATER (1985-2000)**

HAYASHI, Hidemitsu, M.D., Water Institute &  
KAWAMURA, Munenori, M.D., Kyowa Medical Clinic

1. Improvement of blood glucose and HbA1C levels in diabetes mellitus.
2. Improvement of peripheral circulation in diabetic gangrene.
3. Improvement of uric acid levels in gout.
4. Improvement of liver function in hepatic disease, cirrhosis of liver, hepatitis.
5. Improvement of gastroduodenal ulcers and prevention of recurrences.
6. Improvement of cholesterol level; hypertension, angina, myocardial infarction.

7. Improvement of hypersensitive disorders; atopic dermatitis, asthma, urticaria.
8. Improvement of autoimmune disorders; rheumatism, collagen disease, SLE.
9. Improvement of so called specific diseases; Behcetâ™ syndrome, Crohn disease, ulcerative colitis,  
Kawasakiâ™s disease.
10. Improvement of malignant tumors of liver; hepatoma, metastatic tumors.
11. Improvement of general malaise, chronic constipation & diarrhea as well as persistent diarrhea occurred after gastric resection.
12. Improvement of dehydration in infants with vomiting and diarrhea caused by viral infection
13. Improvement of hyperbilirubinemia in newborns
14. Experiences of pregnant women who took reduced water during their pregnancy; almost no emesis, smooth delivery, slight jaundice, enough lactation, smooth and satisfactory growth of newborns.

“Devices to produce reduced water were introduced into our clinic in May 1985. Based on the clinical experiences obtained in the past 15 years, it can be said that introduction of electrolyzed-reduced water for drinking and cooking purpose for in-patients should be the very prerequisite in our daily medical practices.

It is because any dietary recipe cannot be a scientific one if the property of water used by the patients is not taken into consideration.”

The Ministry of Health and Welfare in Japan announced in 1965 that the intake of reduced water is effective for indigestion, hyperchylia, chronic diarrhea, restoration of intestinal flora metabolism and antacid.

## **Use of Alkaline Water on Dairy Farms**

### ***Reports from 27 Dairy farms using alkali water.***

As prepared for IonLife International

With the advent of electrolysis water treatment in the Japanese marketplace, electrolysis alkaline water was introduced into the dairy farms.

This is now beginning to have impact on dairy farms in the USA and other countries.

In Japan, citizens are considered to experience some of the best health in the world and to have the longest life expectancies. They also have more people per capita using ion water machines than anywhere else in the world. Knowing the positive health benefits and results that were acquired through human consumption, alkaline water has been used in place of tap water as the sole source of water for dairy cows in over 27 dairy farms.

The results of this water usage is reported in the subsequent findings. The information was obtained through 27 dairy farms along with a report from a group of veterinarians. The source of each report is identified at the beginning of each report.

### ***In general, the following measurable conditions were noted:***

1. An increase in milk output by 18% - 28%.
2. A notable improvement in the quality of milk.
3. Elimination of strong feces and urine odors.
4. Healthier skin condition.
5. Minimized injury to the udder.
6. Decrease in diarrhea cases.
7. Strengthening of the legs.
8. Increased appetite.
9. Able to reduce mineral supplements normally added to the feed.
10. Due to an improved health condition coupled with stronger legs, extended the productive life span of the cows.
11. Improved the fertility rate and reduced still births in new-born calves.

**Aside from the above, the following opinions were noted by the veterinarians:**

1. A noticeably increased appetite; no new supplements were added to their diet. Increase in appetite noted in older cows also.
  2. Well digested foods.
  3. A beautiful sheen on the cows' hair.
  4. Higher fertility rate; higher pregnancy rate.
  5. A new-born calf exposed to alkali water matures quicker.
  6. A dramatic increase in milk production.
  7. Improved liver condition.
  8. Strengthened legs.
  9. Minimizing of sicknesses; tremendously improved health condition.
  10. No adverse conditions noted with the consumption of alkali water.
- Lesser visits made by veterinarians.

**The following are individual findings that have been noted by each dairy farmer that have replaced tap water with ionized alkali water.**

A. Dairy Farm: Kasahara Ranch  
Location: Nomura, Hokkaido  
Spokesperson: Mr. G. Kasahara

1. The milk output had increase from 7,000kg o 8,900kg or an increase of 27%.
2. The use of the alkali water had instilled a preventive approach to the overall health condition of the dairy cow in lieu of reactive medical means. The overall health condition of the herd had improved dramatically.

B. Dairy Farm: Shikawa Ranch  
Location: Momembetsu, Hokkaido  
Spokesperson: Mr. T. Shikawa

1. There was a noticeable improvement in the quality of the milk.
2. Despite the high temperature during the Summer months, the milk output had increased dramatically.  
During the previous Summer months, milk output had declined.

C. Dairy Farm: Sudo Ranch  
Location: Munetani, Hokkaido  
Spokesperson: Mr. M. Sudo

**NOTE:** Unlike other dairy farms, this farmer discontinued the use of alkali ionized water to measure the effects of returning to normal tap water.

**The following were the effects that were noted:**

1. The strong odors associated with cow excrements had returned after a period of time when the foul odor had been eliminated through the consumption of alkali water.
2. The sheen that was once present on the cows had disappeared and the hair had returned to a lackluster condition.
3. The frequency of diarrhea had increased.
4. Weakness was noticed in the cows legs as opposed to the strengthening of the cows' legs during the use of alkali water.

D. Dairy Farm: Takahashi Ranch

Location: Notsuke, Hokkaido

Spokesperson: Mr. Takahashi.

1. The sickness rate was considerably reduced.

E. Dairy Farm: Hamanasu Ranch

Location: Mombetsu, Hokkaido

Spokesperson: Mr. S. Nakagawa.

1. The coloring of the udder became extremely healthy.
2. Due to the alkali consumption and its natural healing ability, the amount of injury to the udder had diminished.
3. The milk output has increased by 800 kg per cow.  
(NOTE: since there was no "before and after" numbers provided the percentage of increase could not be determined.)

F. Dairy Farm: Karita Ranch

Location: Notsuke, Hokkaido

Spokesperson: Mr. H. Karita

1. The results were excellent in every manner.  
Milk production was considerably higher, the sickness rate was down, problems associated with diarrhea were minimized, the foul odor from the excrement was gone, the cow's appetite was up, the sheen on the cows' hair was considerably higher and the overall quality of the milk was up.

G. Dairy Farm: Sunnydale Ranch

Location: Hyotsu, Hokkaido

Spokesperson: Mr. M. Danshora

1. In prior years, in an effort to increase milk production, increased feed was given to cows.

With the use of alkali water, the need of increasing feed was minimized.  
2. Despite the pregnancy of the cow, the amount of milk production has not decreased.

In prior pregnancies, the amount of milk production had decreased. This was noted in 9 out of 10 cows.

3. The improved health condition of the cows along with the stronger legs have reduced the turnover of cows.

This has considerably improved the productivity life span of each cow.

#### H. Dairy Farm: No Name Given

Location: Mombetsu, Hokkaido

Spokesperson: Mr. T. Yamaguchi

1. The overall skin condition of each cow had improved dramatically.

2. The foul odors associated with excrements and urine were eliminated with the consumption of alkali water.

3. The farm was able to reduce the amount of mineral supplements that were being added to the diet on account of the alkali water.

4. The newly born calves have experienced no diarrhea.

#### I. Dairy Farm: Koizumi Ranch

Location: Kamikawa, Hokkaido

Spokesperson: Mr. T. Koizumi

1. The recovery period for cows giving birth had improved noticeably with the consumption of alkali water.

2. The cows have experienced increased appetite.

3. Despite the higher temperature during the Summer months, the milk output had increased dramatically.

4. The consumption of alkali water had stabilized the pH factor for each cow.

#### J. Dairy Farm: Honami MBB Ranch

Location: Joro, Hokkaido

Spokesperson: Mr. Y. Takigawa

1. There was a remarkable improvement in the quality of milk.

2. The cows increased their water intake which resulted in increased milk production.

3. The cows experienced reduced diarrhea conditions.

4. There was a remarkable improvement in the hair and skin texture of every cow.

#### K. Dairy Farm: Aneshi Ranch

Location: Esachi, Hokkaido

Spokesperson: Mr. K. Aneshi

1. Due to the consumption of alkali water and the improved immunity levels, there was lesser injuries to the cows' udders during the milking process.
2. The milk output had increased from 282 tons to 360 tons or a 28% increase.
3. It was a financially and economically-wise decision to use electrolysis alkali water.

L. Dairy Farm: Royal Farm  
Location: Kamikawa, Hokkaido  
Spokesperson: Mr. T. Sawamoto

1. The milk output had increased from a range of 7,000 to 7,300 kg to a higher output of 9,000 kg or a 28% increase.
2. Due to the unstable water condition, the farm had gone to electrolysis water. This decision ended up being a financially-wise decision.

M. Dairy Farm: Nogyo Kyosai Dairy Association  
Location: Kushiro, Hokkaido  
Spokesperson: Mr. M. Sugiyama

1. The use of alkali water has considerably reduced the number of sick cows and dramatically improved the health condition.
2. The farm has not measured all the positive effects brought about by the alkali water but on the other hand have not experienced any negative effects.
3. One noticeable difference was their improved digestion.

N. Dairy Farm: Okura Ranch  
Location: Asahi-kawa, Hokkaido  
Spokesperson: Mr. Y. Okura

1. The alkaline water has produced healthier cows.  
There were no changes to the diet or the environment but the cows became healthier.
2. Increased their monthly sales by \$20,000.00 through increased milk output.  
(NOTE: There were no other comparative numbers provided to determine the actual increase in productivity levels.)

O. Dairy Farm: Aikawa Ranch  
Location: Akan, Hokkaido  
Spokesperson: Mr. M. Aikawa

1. The odors that are normally present in the urine and excrements were dramatically reduced.

2. The birthrate was considerably increased by the increase in fertility rate and the minimizing of stillborn calves.
3. There was a dramatic increase in milk production.
4. This farm is utilized as a model ranch in the use of alkali water.

P. Dairy Farm: Mitani Ranch  
Location: Yubari, Hokkaido  
Spokesperson: Mr. K. Mitani

1. Experienced 100% fertility and birth rates through artificial insemination.

Q. Dairy Farm: Ueda Ranch  
Location: Akan, Hokkaido  
Spokesperson: Mr. T. Ueda

1. The fortified calcium through the electrolysis water has strengthened the legs of the cows.
2. Due to the dramatically-improved health conditions, the quality of the milk has improved.
3. In the long run, the use of alkali water is a totally economical approach to the dairy industry.

R. Dairy Farm: Yamatani Ranch  
Location: Kamikawa, Hokkaido  
Spokesperson: Mr. M. Yamatani

1. The quality and quantity of the milk has improved considerably.
2. Considerably minimized the sickness rate of each cow.
3. Minimized diarrhea conditions.
4. An overall improvement was noted in every aspect of the dairy cow equating to better economic conditions.

S. Dairy Farm: Yamamoto Ranch  
Location: Amashio, Hokkaido  
Spokesperson: Mr. M. Yamatani

1. The milk output had increased from 317 tons to 393 tons or an increase of 24%
2. The cow became fertile with one month of giving birth.
3. There was a substantial reduction to the number of veterinary visits.
4. There was a noticeable increase in their appetites.

T. Dairy Farm: Saida Ranch  
Location: Shirahata, Hokkaido  
Spokesperson: Mr. K. Saida

1The milk output had increased from 8,641 kg to 10,1 77kg or an increase of 1 7.8%.

U. Dairy Farm: Fukagawa Ranch  
Location: Joro, Hokkaido  
Spokesperson: Mr. E. Fukagawa

1. There was a substantial reduction to the number of veterinary visits.
2. Reduced the swelling rate of the cows' legs.
3. Reduced the rate of external wounds caused by suction cups.

The manufacturer of Active Hydrogen Water Generator, Jupiter Science (Hydrogen-Rich Water H-01) is the leading manufacturer in the world of ionic water machines with over 25 years in production.

To summarize, cows cannot lie and they are not prone to the placebo effect. The worldwide evidence from over 25 years of use has shown us that Ionized Water or Active Hydrogen water has tremendous health benefits for both animals and humans on many levels. When you are ready to take your health to the next level, order a Jupiter Science Water Ionizer from:
