

## **E4 Electron Water Machine Information:**

**Free shipping\*, highest quality, unbeatable performance. The E4 Electron Energized Water Machine produces pure water with electrons from our worldwide patented mini-distiller. It is THE GREATEST HEALTH DISCOVERY OF OUR TIME. For the Health and Healing of people worldwide. We all deserve our birthright of clean air and water that heals and cleanses, instead of poisons. Now you can take matters into your own hands and body. Is it really possible to darken your hair and get rid of cancer, parasites and viruses by drinking electron charged water? Read on and judge for yourself.**

**John Ellis has been an engineer for 50 years and is pictured above. He is in his 70's and claims to be healthier and stronger now than when he ranked #1 in the world in the Discus, because of drinking electron rich, energized water from his patented Electron 4 Living Water Machine shown below.**

**INSTEAD OF TREATING WATER,  
LET IT TREAT YOU!! OVER 100,000 SATISFIED USERS  
OVER 20 YEARS IN BUSINESS**

**This is the technology of the future and it is being used right now. We receive thousands of AMAZING REPORTS from satisfied customers everywhere. The following pages show you how you can obtain fantastic results too.**

**Your body is over 70% water and your blood is over 90% water. With H<sub>2</sub>O there are 2 hydrogen molecules that have extremely tight bonds. We have the only technology available to break down these bonds and increase the bond angle from 104 degrees to 114 degrees.**

**The significance of this is that our electron water machine is the only equipment in the world available to the public that can expand the hydrogen bond of water to 114 degrees and then pack it full of highly energized electrons, making it the most powerful, effective and natural, free radical scavenger and antioxidant that the human body can quickly and easily use in abundance. This product is so technologically unique that it has never been duplicated and it is patented worldwide.**

**Your body is made up of electrons and yet, when it becomes deficient in them, every form of disease is possible.**

## **The "Electron 4" Living Water Machine,**

**Invented, patented, and manufactured in the U.S.A.:**

**Σ Makes 1/2 gallon distilled, energized water per hour (up to 12 gallons per day) and it may be diluted with other water if you desire**

**Σ Makes up to 200 gallons per day of energized but not distilled water**

**Σ These machines are hospital-grade stainless steel, small, weigh only six pounds, and travel well. They are sold brand new, shipped by UPS directly from the manufacturer, with a one-year warranty on parts**

**Σ Allow one week for manufacture and one week for shipping. Free shipping in Continental US.**

**US Patent numbers 4,612,090 (15 claims) and METHOD PATENT 5,203,970 with other patents pending**

**While Health May be Elusive,  
Drugs Have Side Effects**

**With the evidence of common medical drugs averaging 17 negative side effects per drug, doesn't it just make sense to find an alternative?**

**Electron Energized Water is the Solution the world has been waiting for. The only reason you may not have heard about it is because it is completely natural. It is not a drug and therefore drug companies cannot patent it and make a fortune. That's good news for you and me.**

**"Chlorine does not work on the new super bacteria"  
(U.S. Water News - Dec. '88)**

**Viruses are so tiny they pass through any air filter, water filter, reverse osmosis machine, ozone machine, or ordinary distiller, along with bacteria that also survive the other methods. It's scientifically impossible for ordinary water distillers to make pure water because of their high steam pressure (pollutants are carried over with the steam)!**

**Our patents show we stop the boiling and recycle the water every 20 seconds!  
In this way, there is no steam pressure and the water gets purer and purer as it recycles.**

**Here is how the Living Water machine handles the new untreatable viruses and bacteria that are everywhere- It uses intense heat (the way they get rid of infectious waste)!! Like tea leaves, viruses, parasites, and bacteria are very light. As the water boils, they are frothed to the surface. Then, as the water goes out of the boiler to be recycled, the deadly micro-organisms are left on the two heaters and the sides of the boiler. Since the heaters are now out of water, the intense heat destroys them... this process repeats 400 times for every gallon of water you distill to get ALL of the deadly micro-organisms!**

## **The possibilities are endless!!**

**This new technology is needed to combat the rising costs of medical care while making other home water treatment products obsolete, regardless of purity! Read our literature and decide for yourself what pure energized water might do for you. Yes, it's okay to get excited.**

**Σ Endless health applications; every body needs water and electrons. Energized, electron rich water from the E4 LWM machine is one of a kind in all the world. You may save thousands of dollars annually on vitamin pills, powders and the like. You won't need them anymore.**

**Σ Completely safe and natural and needed by all humans, animals, fish and plants**

**Σ Safely and effectively treats contaminated wells, cisterns, water tanks, pools and hot tubs**

**Most people assume that they are the first person out of billions of people and animals on this planet to have used their water. Wrong! Our electron water machine is the only water purification technology on the market that can remove the old disease markers from water.**

**Although it's something you may not want to think about, do you assume the water you drink every day has never been through thousands of toilets, leaving the disease markers of former users in the water!! Home water products don't remove them! Disease markers of former users cause the purest water to go bad in a bottle and**

**develop a horrible smell in a hot tub even if you don't use the hot tub. The water you drink every day is contaminated with the disease markers of millions of years of use.**

**Your body is over 70% water and your blood is over 90% water, yet the water most people drink is dead, lifeless and devoid of nutrients, electrons and oxygen. The solvent capabilities and life enhancing, free radical scavenging electrons no longer exist. Where do you think health problems come from? Why do you think cancer and heart disease are the two leading causes of death in America? Sure, diet is an obvious culprit, but it's also the water. Why do you think it is that a hundred years ago cancer was rare and now it is as prevalent as the common cold. Energized, electron charged water is what every body needs. It's the true nectar of the Gods.**

**Blood tests prove conclusively every time in a matter of hours the effectiveness of this brilliant technology. The results are undisputable. With an electron microscope you can actually see the difference in the nature of the cells. With a sick person you will see slow moving deformed clumping cells, which is common in most people these days. After drinking energized, electron rich, living water from our E4 LWM machine, you'll see individual, plump, round, healthy, active cells.**

**We use medical grade equipment to achieve results that are unheard of. Scientists agree, it works!**

**It can change your life!!**

**The Prostate Challenge--This Water will easily pass through a membrane and into the cells**

**Take for example the 90% of all men that end up with a urinary flow problem and can't urinate even the purest water (the bond angle is too tight only 104 degrees). Prostate cancer is nearly an epidemic! As a challenge we say: "Give our water to a man with a swollen Prostate"! The problem goes away immediately and we don't mean in a week! It's a non-medical way to prove that when you break down the bonds in water it will easily go through a membrane and into the cells carrying nutrients and electrons that destroy free radicals!**

**We received an order from a pharmaceutical firm that manufactures hormones on a recommendation from a UCLA Doctor that is the head of a research firm. They proved our water will go through a membrane better than any water they ever tested! They said: "In your lifetime there are only a few people like that UCLA Doctor that will cross your path!" Another one of the world's top scientists has our Electron Machine in his own home and will use no other.**

## **The pH Miracle**

**Robert O. Young, PhD, in his new bestselling book, The pH Miracle, says on page 94, in the chapter titled "You Are What You Drink:" "I know of only one home appliance that provides a reasonable simulation of nature's water-processing system, alternately heating and cooling the water. It is called the Living Water Machine (see Resources) [And when you go to the Resources section of the book, page 324, you find out he is talking about John Ellis' Electron 4 Living Water Machine - as featured on this page]." He goes on to say: "It produces very pure distilled water that is...biologically active - that is, alive - by keeping out organic solvents that other machines may transfer to, and even concentrate in, the distilled water."**

**It is nice that Dr. Young gives Ellis' machine positive mention, but at the same time he exposes limited knowledge of how the machine works, what it does, and how great it really is. So read on and learn more.**

**The pH of the water from the Electron 4 Living Water Machine is perfect for the body at 6.8 -7. It is neutral and if you want it to be more alkaline and electrically active, all you have to do is add a few drops of liquid ionic minerals. It's amazing the difference you can feel immediately.**

**Due to Disease Markers in water, today's water is helping to spread disease!  
Everybody is drinking somebody else's disease because**

- 1. Today's water is low in Electrons that destroy free radicals that cause disease**
- 2. The disease markers of former users are still in the water!!!**

**All water, even common distilled, contains disease markers. The "LWM4 or Electron 4" Living Water Machine produces high energy, pure, distilled water with all diseased memory removed, and a high electron count with abundant oxygen retention. The machine's patented process expands the water molecule, increasing the water's capacity to carry free electrons and oxygen. It also lowers the surface tension of the water resulting in improved hydration. Better hydration means it will permeate cells and tissues better, it will transport nutrients to the cells better and transport waste from the cells and out of the system better, and it will be more conductive electrically.**

**Our bodies are made up of 75 Trillion cells that need to communicate with each other and electrons are the means by which they communicate. Our bodies are**

**electrical networks. Cells and nerves communicate with electrical impulses which are passed through the water of our systems, the more conductive the better. The conductivity level depends on the amount of free electrons in the water we drink and our bodily fluids. Tap, bottled, and normal distilled water have no free electrons at all. A quart of Energized water from the Electron 4 Living Water Machines has one million free electrons!**

## **A Discourse in Electrons -- Questions and Answers**

**What is oxidation and what are "free radicals"? Oxidation is that process whereby "free radicals" ( electrically imbalanced atoms or molecules which are missing electrons) take electrons away from stable atoms or molecules, causing damage, destruction or mutation of the cells, which are composed of these atoms or molecules. The consequential result is all manner of disease including cancer and arteriosclerosis (heart disease). This process is called "oxidation", because the most prevalent and deadly free radical is the oxygen free radical, Super Oxide. Since all free radicals operate the same, they have named the process "oxidation," even though oxygen is not involved except in the case of Super Oxide.**

**How do you prevent free radicals from damaging your cells and causing disease? Since free radicals need electrons, free electrons in the system combine with these atoms and neutralize them, so that they don't take electrons from stable atoms or molecules and, therefore, don't damage cells.**

**Where does one get electrons into their body? Most water these days is dead and polluted, however when you drink Energized Living Water, only available through our patented Living Water Machine, you fill your body with millions of free electrons, which the body uses to neutralize free radicals. These electrons can neutralize free radicals and kill pathogenic bacteria, viruses, funguses, and yeasts, which all have positive electrical charges and can be neutralized by the negative electrical charge of the free electron.**

**How does it effect beneficial bacteria in the body? Beneficial bacteria in the system have negative electrical charges and are not harmed by free electrons. This is the difference between the alopathic approach to healing with chemical drugs and antibiotics, which kill everything including the necessary beneficial bacteria of the intestinal tract. Electron living water is totaly natural, nutritional healing, which destroys the bad bacteria and leaves the good bacteria alone, thereby strengthening immune functions and all other systems.**

**Is it really possible to grow new hair and change ones hair color from gray back to it's original color? Art Franklin, the founder of HTN, met John Ellis. John Ellis told Art Franklin that he had heard from several men who had been bald up to 40 years**

and grew full heads of hair within a year by drinking the Energized Water. Art was skeptical, but in only one month of drinking the Energized Electron Water himself, he experienced new hair growth, and his hair started to turn back from white to its original dark brown color. ## **THE WHOLE WATER STORY**

**Today's water is helping to spread disease!**

**All water, even common distilled, contains disease markers. The "Electron 4" Living Water Machine produces high energy, pure, distilled water with all diseased memory removed, and a high electron count with abundant oxygen retention. The machine's patented process expands the water molecule, increasing the water's capacity to carry free electrons and oxygen. It also lowers the surface tension of the water resulting in improved hydration. Better hydration means it will permeate tissues better, it will transport nutrients to the cells better and transport waste from the cells and out of the system better, and it will be more conductive electrically. Our bodies are electrical networks, cells and nerves communicate with electrical impulses which are passed through the water of our systems, the more conductive the better. The conductivity level depends on the amount of free electrons in the water. Tap, bottled, and normal distilled water have no free electrons at all. A quart of Energized water from the Electron 4 Living Water Machines has one million free electrons and registers a pH of around 7, which is neutral and ideal for life. Not like normal distilled water which is around 2 or very acidic.**

**So what does this mean? First of all, acids cause disease and death. Problems such as hardening of the arteries, fat, kidney stones, gall stones, arthritis, cancer, the list goes on. In order to get healthy and stay healthy, we must alkalize our bodies as normal metabolism, incorrect diet, and environmental factors are acid forming. (Reference: Dr. Theodore A. Barody, ALKALIZE OR DIE, the seminal book on the relationship of pH to health.) The quickest and most effective ways to alkalize is by drinking Distilled Energized water. To make the water more alkaline and to increase the number of electrons and electrical conductivity of the water, just add some liquid ionic minerals.**

**Oxidation is that process whereby "free radicals" (electrically imbalanced atoms or molecules which are missing electrons) take electrons away from stable atoms or molecules, causing damage, destruction, or mutation of the cells, which are composed of these atoms or molecules, resulting in all sorts of disease including cancer. They call the process "oxidation" because the most prevalent and deadly free radical is the oxygen free radical, Super Oxide. Since all free radicals operate**

**the same, they have named the process "oxidation," even though oxygen is not involved except in the case of Super Oxide.**

**Since free radicals need electrons, free electrons in the system combine with these atoms and neutralize them, so that they don't take electrons from stable atoms or molecules and, therefore, don't damage cells.**

**The free electrons that come into the system with Energized Water or Energized Water fortified with liquid ionic minerals are used to neutralize free radicals. These electrons can neutralize free radicals and kill pathogenic bacteria, viruses, funguses, and yeasts, which all have positive electrical charges and can be neutralized by the negative electrical charge of the free electron.**

**Beneficial bacteria in the system have negative electrical charges and are not harmed by free electrons. This is the difference between the chemical drug treatment of disease, which kills everything even the necessary beneficial bacteria, and natural, nutritional healing, which destroys the bad bacteria and leaves the good bacteria alone, thereby strengthening the immune and all other systems.**

**Put any water, tap, reverse osmosis, spring, distilled, filtered, etc. into a hot tub without any type of chemical treatment, circulate it at 98.6F for a few days, and it will start to smell bad. Why? Because all water on earth, even distilled, is very low in oxygen levels and has stored memory of what it has been contaminated with over many centuries of time. Bacteria, viruses, and spores will spontaneously begin to develop.**

**All water, after it leaves a purifying system quickly grows viruses and bacteria at room temperature. The John Ellis Living Water machines fix this by changing the properties of the water so that it will take on free electrons and maintain high levels of oxygen (just pumping oxygen into the water will not do it, because you have to break the hydrogen bond angle before the water can take on electrons and oxygen).**

**Today's water is spreading disease at an alarming rate, and that is well-documented. For example: chlorine doesn't even kill a rapidly growing list of bacteria anymore (Water News, Dec. 1998).**

**Our bodies are 70% water, our blood 90%. What do you suppose drinking contaminated water is doing to you? On the other hand, imagine the profound effects of drinking energized living water. You can taste the difference immediately. The water is soft and sweet and refreshing and instantly hydrating.**

**Mr. Ellis explains that water's memory can only be removed by the expansion and contraction of the molecules at a higher rate than would normally be found in the environment. In the environment, the change in temperature (which causes expansion and contraction) at any particular instant is only a fraction of a degree or at most a few degrees - not enough to remove the memory.**

**Mr. Ellis' machine provides repeated expansion and contraction of the water molecules with a differential temperature of 80 degrees or more per minute. The water vapor created by Mr. Ellis' machine's boiler is then exposed to a high intensity ozone light from a special device developed for Mr. Ellis by Owens Corning. The ozone reacts chemically with the vapor, adding high concentrations of free electrons and oxygen (not ozone) into the absolutely pure distilled water the machine produces, after the bond angle is expanded to 114 degrees.**

**With the memory removed, small amounts of this concentrated electron water (about 2% of any total water volume) can maintain pure clean water in hot tubs for YEARS without any type of chemical treatment. The same applies for fish tanks, wells, or even whole aquifers. But note: the electron energized water will not clear up algae. Algae, although you may not want it in your fish tanks or ponds, is a naturally-occurring, healthy growth. In fact it is even, dried, powdered, and sold as a health supplement. If you want it out of your fish tanks, you will have to control the light. Energized water will neutralize and clean up bad bacteria and rot, not healthy growth.**

**You can refresh your body by putting 6 oz. of Electron Energized Water into your bathtub water at least once a week. Growing plants and vegetables with Electron Energized Water increases their vitality, size and production.**

**Medical data shows electrons kill viruses, pathogenic bacteria, and parasites with astounding effectiveness. Science and VIE 9/98 describe how doctors at Geneva University Hospital found that electrons (the same as found in the water produced by Mr. Ellis' machine ) kill pathogenic bacteria!**

**The original oxygen levels on earth are reported to have been at 38%. Today, oxygen levels register at 8% (Sci America). Other scientific research indicates that the number is more like 18 to 21%. But whatever the actual number, obviously oxygen levels are decreasing drastically with dire consequences.**

**As oxygen levels have been decreasing, electron levels have also been decreasing, and sickness levels have been increasing. Disease is rampant. There simply aren't enough electrons in the atmosphere to kill the viruses, pathogenic bacteria, and parasites that are mutating beyond the control of antibiotics!**

**Low oxygen is the basic cause of health problems, including aging and cancer. Old age is not caused by time! Oxygen levels are way too low! And we are no longer getting enough germ killing electrons in the air we breathe and the water we drink.**

**We all know this is happening, and it's happening right now!**

**If you believe the Bible, it documents that before the flood, people were living up to 1000 years. There was much more oxygen and free electrons in the air, and of course, the water was not contaminated.**

**Now, for the first time in the 21st century, we can get the electrons and oxygen we need!**

**Water treatment plants across the U.S.A. are adding many different chemicals to the water, to try to control the multiplying bacteria before it reaches your home. This water has a memory - plus chemicals! It basically toxic. Chlorine by itself is linked by hundreds of studies to be a direct contributor to disease.**

**What kind of water are you drinking?**

**Chemically treated tap water won't kill you right away, but just like cigarette smoking, it is slowly taking its toll. Our bodies are not designed to handle man-made chemicals.**

**Take charge of your health! Drink the best water possible! That is one of the most important things you can do for yourself.**

**Dr. Allen E. Banik, lifetime student of and expert on water and its relation to health and disease, author of a great little book on water titled *The Choice Is Clear*, says that when you drink any water except distilled, you are putting into you body, sometimes more, sometimes less, but always some, just those elements that your body should be eliminating: heavy metals, inorganic metals, toxic chemicals, viruses, bad bacteria, spores, funguses and yeasts. But when you drink pure distilled water you are not putting in any of these noxious elements at all, and you are dissolving and flushing out those that are there. Distilled water acts as a solvent to clean the body. While normal distilled water has no electrons, when you drink distilled Energized water from The Electron 4 Living Water Machine, you get both distilled water and an abundance of the electrons, which serve to scavenge and destroy the free radicals of parasites, bacteria and viruses that compromise the immune system.**

**Taking it even further, when you drink distilled Energized water from John Ellis' Electron 4 Living Water Machine, you get all the benefits of distilled plus the added benefits of a water freed of diseased memory plus extra electrons and oxygen and lowered surface tension and enhanced hydration. Most people are dehydrated and don't even know it!**

**Ellis' electron energized water filled with electrons and oxygen provides an unparalleled basis for an ultimate health program, but it is not a silver bullet, not a panacea. It does not provide nutrients such as vitamins, mineral and enzymes that the body needs to repair and rebuild itself. These should come from a whole food diet rich in fresh, frequently raw and primarily organic produce, grains, nuts, seeds**

**and small quantities of quality organic animal products. Avoid all refined foods, sugar and saturated or heated fats.**

**The best of all possible combinations is Ellis' Electron 4 Energized Water**

## **ELECTRONS AND WATER WISDOM**

**Most VITAMINS, OXYGEN and BODY ELECTRIC PRODUCTS CAN'T WORK optimally without the ELECTRONS found in CHARGED WATER!! YOU are ELECTRONS...along with FOOD, WATER and AIR... NO WONDER people get such AMAZING results!!With OXYGEN dropping from 38% to as low as 8%, it's causing BIG problems!! However, most people don't realize it until it's TOO LATE!!**

**More on Water: ANY LAB will tell you, many other health promoting activities can't work without the ELECTRONS found in CHARGED WATER because OXYGEN levels have dropped to as low as 8%, in today's water molecules, they are SMALLER and CAN'T HOLD the additional donor ELECTRONS (from OXYGEN) needed to make them work!! As a result, VIRUSES and BACTERIA are mutating out of control... CAUSING almost ANY problem you can name!**

Here is **PROOF** that **ELECTRONS** Exist in our water

Just putting **OXYGEN** into water does **NOTHING** (unless you are a fish)... the molecules must first be extended **USING A PATENTED METHOD OF EXPANSION AND CONTRACTION OF THE WATER MOLECULES SEVERAL TIMES/MINUTE TO CONSUME OXYGEN, WHILE TAKING ON DONOR ELECTRONS!** Our patented method **EXPANDS TODAY'S WATER MOLECULES...** so they can take on more donor electrons! It's logical that most products are activated by the **ELECTRONS** in **WATER**, since **YOU** are **75%** water (blood is **94%**) it's these **ELECTRONS** that make a product work!

This picture is a close up view of one ice cube that grew up **2 1/2** inches out of the ice tray. This is proof that electrons are present.

**MOST VITAMINS CAN'T WORK** because there aren't enough donor electrons to make them work! It's like a leaf that falls off of a tree, the nutrients are still there, but it's **ELECTRICALLY DEAD...**they must be reactivated by **ELECTRONS!** Since **OUR WATER MOLECULES** are **LARGER** (as any lab will confirm), they **HOLD MORE ELECTRONS...**like it was when **OXYGEN** was at **38%** and rainwater was highly charged, potentially explaining the incredible ages mentioned in the **BIBLE!** **THAT'S WHAT OUR PRODUCT DOES,** nature's way!

This is a **MOMENTOUS BREAKTHROUGH** because **ELECTRONS KILL VIRUSES** (ordinary water doesn't have enough **ELECTRONS**), returns wells to purity, and expanded molecules **STAY THAT WAY.** Energized water **STORES INDEFINITELY** (you **CAN'T** do that with ordinary water... look at the Expiration Dates). Today's water molecules are **TOO SMALL...**any lab that studies the properties of water can **PROVE IT TO YOU!** **DON'T** listen to all the scientific jargon about products!

All you need to know: **IS THE WATER MOLECULE LARGER** (it isn't)? If it isn't, the product can't work regardless of what they tell you. This was recently confirmed again by a Bio-Tech firm that tested **TWO** of our fine-tuned machines in their labs. Most importantly, our water molecule is **LARGER** with the same molecular weight as an ordinary water molecule and since the electrons kill viruses, they are using the water for proprietary medical applications. They also found the angle between the hydrogen atoms is **10 degrees** greater, the viscosity is different and it has a beautiful crystalline structure at **ROOM TEMPERATURE** that is dodecahedral (12 planes).

**The implications of JOHN ELLIS' WATER MOLECULES are INCREDIBLE as user reports continue to pour in! The ONLY water a thinking person would want! THE LIVING WATER MACHINE is a little 6 pound machine you can use anywhere!**

## **WONDERS AND FACTS ABOUT H2O**

- Σ **"Chlorine does not work on the new super bacteria" U.S. Water News Dec. '88!!**
- Σ **The Human Body is composed of over 70% Water and blood is 94% Water.**
- Σ **Pure water is the most cleansing and healing substance for humans.**
- Σ **Research chemist Herman Meinke took these pictures. Herman has grown 18 foot corn, gigantic vegetables etc. and one major university, after turning a well pump off and pouring this amazing water down a well (pump off 4 hrs.) was AMAZED to find BACTERIA had gone from SKY HIGH to ZERO!**
- Σ **Osmosis in trees and plants STOPS when it's raining and starts again when it's DRY! Using the water to make ordinary ice cubes, though the ENERGY is still there, it only expresses itself, and osmosis only occurs, when it's not raining. Water processed TRULY nature's way (God's way if you will) is "programmed" to respond this way. This is the water our Lord and nature wants you to have!**

**NO OTHER WATER CAN DO ALL THESE THINGS!!  
It's TRULY "DISTILLED NATURE'S WAY!"**

### **Facts about Drinking Water Quality and Contamination**

**Drinking water pollution comes from many sources. Surface water becomes contaminated from agricultural runoff, community landfills, polluted runoff (the nation's leading cause of water pollution), and hazardous waste produced as byproducts of manufacturing. Groundwater is contaminated by leaks of pollutants such as gasoline and MTBE from underground storage tanks and injection of hazardous waste into deep wells (which is being phased out). The drinking water treatment industry is experiencing significant growth due to consumer demand for products that could protect them from these potentially harmful contaminants which may be found in drinking water supplies as well as aesthetically improve their water in both clarity and flavor.**

### **REPORT FINDS SIGNIFICANT POLLUTION LINKED TO CHRONIC HEALTH IMPACTS**

**According to (U.S. PIRG News Release, January 22, 2003, Washington, DC**

**"U.S. Industries discharge several billion pounds of toxic chemicals linked to cancer, reproductive and developmental disorders, and other chronic health problems each year." Meghan Purvis, U.S. PIRG environmental health associate reports, "Polluters across the country discharge billions of pounds of toxic pollution linked to serious health impacts each year. But without adequate public health systems for tracking environmental exposures and potentially related disease, we don't know how this pollution is affecting our health."**

**Significant amounts of pollution linked to chronic health problems documented in the report include:**

**Σ More than 100 million pounds of carcinogens were released into the air and water nationally in 2002.**

**Σ Tennessee ranked first overall in releases of both developmental and reproductive toxicants, followed by Alabama and Illinois in 2000.**

**Σ More than 1 billion pounds of chemicals suspected to cause neurological problems were released in 2000.**

**Σ Over 1.7 billion pounds of suspected respiratory irritants were released into the air and water in 2000.**

**Research also showed that the public lacks information on how toxic pollution affects human health.**

## **HISTORY AND EXPLANATION of ELECTRON WATER**

**In the beginning, as the earth cooled down, clusters of water molecules gained Electrons and tremendous energy with every expansion-contraction... explaining Biblical ages! Patents and proprietary secrets show we have duplicated that process with properties so unique we can prove in court it's our water! These properties can also be used to expose a scam!! Today, water LACKS ENERGY because there is very little expansion-contraction of the water, AND THAT'S WHY VITAMIN/MINERAL SUPPLEMENTS PRODUCE LITTLE RESULTS (see below).**

**Ordinary distilled water is the worst because KEEPING WATER AT THE BOILING POINT FOR HOURS DRIVES OFF ELECTRONS NEEDED TO LIVE... it's biologically dead and it's highly acidic. Nothing will grow in it and fish die... it's NOT distilled like in nature and yet people drink this water?? To get around the boiling problem, we boil for ONLY SECONDS (expand) and then cool about 80 degrees (contract), repeating several times a minute, GAINING ENERGY WHILE DUPLICATING NATURES PROCESS!! The end product is perfectly balance pH of 6.5-7. Ideal for the body in every way.**

**That's why users talk about miracles with this water on TV, books and in letters which are kept on file... using our energized distilled OR energized tap water!! In spite of the above (with a PAID approval and a forced govt recall), a popular plastic distiller was advertised in catalogs as the best until it was tested and withdrawn (letters on file). Ultra-pure water was also advertised. People BELIEVE the ads with DISASTROUS CONSEQUENCES (it ALSO requires pretreatment, deionization and filtration)!**

**If you are skeptical about this machine and the results it professes, then consider this. John Ellis is the only one in the world that knows how to use electrons and differential pressures to get RESULTS (6 days to build a machine)! A doctor said: A lot more is going on than meet the eye! Honeywell told ITT, 50 people working for him including Engineers, making 10,000 switches/day couldn't figure out his .0001 differential switch (a measuring device he invented at 17 is still used world-wide).**

**ELECTRON WATER AND AIR MACHINE!! 30 years ago a man sold little bottles of water at a health show...telling people to put a few drops in a glass of water! The results were so overwhelming it started an industry! JOHN ELLIS RECEIVED THE FIRST PATENTS\* and yet now we have scam artists coming out of the woodwork...others trying to take credit with scientific explanations with only negative results similar to alkaline water (heart palpitations, wounds that won't heal, urinary infections, etc.) Accept no substitutes. The LWM Electron 4 Water Machine patented by John Ellis is the real thing!!!**

**YOU DON'T NEED A LOT OF PRODUCTS, VITAMINS OR A SPECIAL DIET TO HAVE ELECTRONS PRODUCE THE AMAZING RESULTS WE RECEIVE ON ALMOST ANY SUBJECT. HOWEVER, SINCE THE INVENTOR IS AN ENGINEER, NOT A DOCTOR: THIS INFORMATION IS FOR EDUCATIONAL PURPOSES ONLY. IT IS NOT INTENDED TO DIAGNOSE, TREAT, CURE OR PREVENT DISEASE.**

**STATEMENTS CONTAINED HEREIN HAVE NOT BEEN EVALUATED BY THE FOOD & DRUG ADMINISTRATION.**

**AS IN ALL HEALTH SITUATIONS, QUALIFIED PROFESSIONALS SHOULD BE CONSULTED. SCIENTISTS AGREE! YOU ARE THE ONLY ONE WHO IS ULTIMATELY RESPONSIBLE FOR YOUR OWN HEALTH.**

**Electron Water Testimonials --Please Scroll Down**

**Free shipping\*, highest quality, unbeatable performance. Energized water with electrons from our worldwide patented distiller is THE GREATEST HEALTH DISCOVERY OF OUR TIME. For the Health and Healing of people worldwide. We all deserve our birthright of clean air and water that heals and cleanses, instead**

**of poisons. Now you can take matters into your own hands and body. Is it really possible to get rid of cancer, parasites and viruses by drinking electron charged water? Read on and judge for yourself.**

## **TESTIMONIALS**

**"I have been involved in laboratory work for many years. My medical background and scientific degrees made it immediately apparent that you are on to a fundamental breakthrough with sufficient improvement in cell physiology for the body to heal itself of potentially fatal pathologies!" W.C. Pauls Valley, OK**

**"A 4 day old Holstein calf that had a case of scours so severe his eyes had sunken in was back to normal on only 1 gallon of water. When 100cc were put into quarter of a cow with mastitis, the swelling was down and the tumors had shrunk by next morning!" R.D. Odessa; MO**

**"I ordered 2 E 3's with good results, I need 3 more, next day delivery." M.D. in Chula Vista, CA**

**"I'm indebted to you!" M.D. in Rialto, CA**

**"After a serious accident, I was barely able to move. Now, in a short while, I am stronger than I was 20 years ago!**

**" M.M. Londonderry, NH "I lost 10 pounds in 3 weeks and so did my wife. A plant that hasn't bloomed in 3 years bloomed!" J.C. Gulf Breeze, FL**

**"My corn, in the news article, was 22ft. tall with ears over 2feet long! Just your water and no chemicals!" H.M. Farmington, MI**

**"A problem I had for 12 months stopped immediately!" R.G. Mariposa, CA**

**"My test revealed properties so amazing, I am using it for proprietary medical use!" Dr. G. A. Torrance, CA**

**"A friend in Texas said his gray from his hair is disappearing! Already, 25% of my wife's hair has turned dark and 50% of mine!" R.H. Anoka, MN**

**"The same water was in my hot tub for 3 years! I've had 4 hot tubs and no other water can do that without further treatment!" B.E. Alpine, UT**

**"You will revolutionize the pool, spa and public water systems worldwide! After swimming in your Olympic size indoor pool, the electron rich water made me feel 50 years younger and a severe case of arthritis felt 100 times better. He's an engineering genius. I would like to get in on the ground floor and buy stock in his company!" E.M.D. Middletown, NY**

**The power of Electrons! From the lead doctor... He called the Herpes Control Center... He feels so much stronger... Where gray hair turns to black... I am now off of all my 23 prescription drugs...**

**Dear John: I want to thank you for your wonderful water machine. At my age it's the best thing I could buy. I'm 78 and have been drinking the water for about two months. I just recently noticed that my body feels stronger every day. It's a wonderful feeling. I sleep longer, more soundly and even look better. Yesterday, sitting at the mirror in a strong light, I noticed a sprinkling of brown roots coming in my stone-white hair. WOW! Thanks again Yours in Great Health, K. M. Valley Center, CA.**

## **EXPERIMENT AND TESTIMONIAL**

**Learn the truth about water It may save your life!!**

**Try this experiment with any other water and you will know even the purest water may spread disease!!**

**Dear Mr. Ellis,**

**I spoke to many companies, and yet with all their claims no one talks about the disease markers and the disease memory that is in all water, no matter what filtration or purification process it went through. No one speaks about electrons that kill the free radicals that cause cancer. No one mentions the fact that all water as we know it, cannot hold free oxygen electrons that act as "antioxidants", or free radicals killers. No one talks about the structure of water, and permanently breaking the extremely tight hydrogen bonds, which is the key to having the water products permanently hold these electrons. No one, especially the manufacturers of oxygenated water products, explain the fact that oxygen is a "two edged sword". It's needed for life, yet its high reactivity robs electrons and causes free radicals that cause cancer and other diseases. And no one tells us the simple truth that everything is electrons, including you!**

**And still after all of this, we need proof. Well, we can prove it to ourselves. I don't own a hot tub, but my niece has a small, two inch, fresh water African frog named "Henry". These frogs live under the water. He's in a 4 gallon plastic tank with some**

colored rocks and fish tank decorations. It was filled with tap water. Three months ago I bought a small inexpensive air pump with a small carbon filter, so that I could save my sister the trouble of changing the water every five days. That's all, no chemicals or aquarium products added. Without the air pump and filter, the water would get cloudy and smell after about five days.

I was fortunate enough to get a sample of Electron Energized Distilled Water made from a LWM Electron 4 Machine, and now it was time to prove it myself. I took the air pump and filter out of the tank. I left all the same water in the tank, with all of the waste and food from the previous three months. I did not even wipe or clean the sides of the top of the tank above the water line, which were covered with a layer of film. I poured into the tank about 10 oz of the energized distilled, which is equal to about 2% of the 4 gallons. Then I let it sit stagnant and accumulate the waste and decaying food.

It has been 4 weeks and the water is still CRYSTAL CLEAR, and it still smells clean and Henry is doing great. In fact when I first poured it in, he came out of his hiding place.

You don't need to be a rocket scientist to figure out what happened here, nor do you need elaborate testing equipment. When the bacterial infestation gets out of control, you can see it and smell it. This would normally start to happen after about five days, not to mention the fact that each additional day would compound the problem. Just by adding 2% of THE WATER to the water, it has remained clean and clear after 4 weeks. Amazing, powerful, and miraculous. I said to myself, "If it can do that to Henry's water, imagine what it can do in your body!"

Thank you for making your Living Water and Air Machines available to us, and for increasing the electrons added! The LWM ELECTRON 4 is the most amazing, well built, and ingenious thing I ever bought and I love it. It is a "precision work horse"! It's hard to believe that something so simple can produce such amazing results. But that's the beauty of simplicity - "there's more to it than meets the eye". Underneath the surface, it goes infinitely deep. I thank God that I found out about your electron water machine and pray that I'm able to write to you again with even more miraculous testimonies! Thank you Mr. Ellis and God bless you.

Sincerely,

Chuck Yagiar

**PLEASE HELP SAVE THE ENVIRONMENT -- LEARN HOW HERE!**

**Every year thousands of wells, cisterns and other water sources suddenly go bad without warning and have to be condemned because water "treatment" can't restore them to purity! The situation is growing worse with every passing year as pollution increases at an exponential rate! People are dismayed to find that "water treatment specialists can't help them and their most valuable possessions their homes and properties, become worthless! Instead, with this technology, people are increasing the value of their property and buying up distressed properties at fire sale prices that in some cases become worth millions whole communities may become affected!! Here is a typical example of how our customers have ignored the science, because it has never been done before, and restored 100's of water sources including wells and cisterns to purify while saving the environment!!**

**A young girl, with her father making the water, has treated over 200 wells and cisterns that ranked from bad to putrid, when other products wouldn't work, using only 10 gallons of energized tap water at each well or cistern only one time!! Year after year state inspectors testing on site (not lab tests) pass them with flying colors! Doesn't that tell you that ordinary water treatment has major problems! They can't treat the source and if you read our literature you know they are spreading disease as well! If they aren't, then why can't they treat wells or cisterns?? They can't for the same reason that the purest bottled water goes bad and treatment is needed in hot tubs! Among other problems that we don't reveal, there are disease markers for every disease imaginable from the waste of former users in the water that even the best purifiers don't remove!! Although we sell thousands of machines, most people really don't care and they will reap the rewards of their folly while they help to destroy the environment for future generations! People that use these products return these diseases back to the environment eventually causing water supplies to become untreatable and properties lose their value! Obviously, after reading the testimonials which we have to keep on the file by law and reading what follows you know that putting oxygen in water, pumping ozone through water etc. or any of the other water treatment methods available have significant limitations and that they can't do any of the things the electron living water machines do, because what they do doesn't last!! Again, we are doing something that nobody else knows how to do or they would have the worldwide patents we have and be doing it themselves. It reminds the inventor of when he received calls and letters from engineers and scientists from all over the world stating there is a mistake in his microswitch catalog, i.e. the differential movement on one of his switches is wrong! It should be .001 (one thousands of an inch) and his catalog states .0001 which is impossible! They were wrong! He built 10,000 switches a day for major corporations and to this day nobody has been able to duplicate that switch in volume! Now, it's deja vu all over again!!**

**What we do is open up the bond angle in water by at least 10 degrees so it can accept (not only nutrients) but electrons and oxygen that it miraculously maintains in a stable form. Oxygen in it's various forms break down! Other devices are not "putting oxygen in water" or they would get the results we do! A low tech way to show that you have changed the bond angle in water (there are high tech ways also)**

is to fill a clean hot tub with energized tap water. You will see by the refraction of the light (in the side of the hot tub) passing through the water that it's different from anything you have ever seen before! Also when you add only 10 gallons of energized tap water, (you do this only once to any well or cistern) and as long as the water is moving even periodically, you will never have to use any "treatment" of any kind. Try that with any other product!!

This young lady called us a few years ago and instead of questioning "the science" or being a doubting Thomas, she simply asked us how to charge a Well or cistern and went out and made a lot of money while achieving phenomenal results for her customers that were overjoyed with her success! At the same time, instead of giving lip service to "helping the environment", she did something that has had a tremendous impact! Once in awhile we receive calls from people that question the science. However, most people say: it just makes sense! and buy a machine. In any case, with thousands of calls coming in every month, we don't have the time to go into science in great detail and we couldn't answer the questions anyway because most of the answers are proprietary! As one scientist said: A lot more goes on in your machine than meets the eye! That's why they can't copy it (in spite of worldwide patents) because (like microswitches) they don't understand the details including differential pressures and how they work! Once in a while we receive faxes with so many questions that we would have to hire extra staff to answer them! If anyone still has doubts, after reading our literature, testimonials and even patents in most countries that are available at any patents annex or library, than unfortunately this is a person we can't help!

We knew over 20 years ago (after a university tested a well before and after) what our energized tap water would do but we didn't use it because it sounded so crazy we thought it might hurt our business! Today, as the world spreads world wide, we have so much business we don't care!! It's like Deja vu (ala Charles Kettering) when the top scientists and electrical engineers at major universities told him that it was impossible for a little battery to turn over an automobile engine. They were wrong! Like this young girl, he ignored science and did it anyway with great success! Here are some excerpts from a 6 page fax she sent us recently. Unlike machines that treat water, this is the first water in the world that can be used to treat water with astounding implications:

I found that in working in the health field, family members all had the same symptoms because water is the common denominator between them. This is what led me to treating over 200 wells and cisterns (from bad to putrid)! Each had their water system treated with what I call the most amazing water system available. In most cases, I wouldn't feel comfortable washing my hands in their water. You are only as healthy as the water you drink.

In treating these water systems they all reported the same results and the water tasted better and it was softer. Some of the stories are as follows :

## **MORE TESTIMONIALS**

**Σ I treated several dairy farms where the milk had very high bacteria counts. Once the water was treated the bacteria was gone and milk production increased. One of the cows, before the water was treated, would walk right by the watering trough and go to the creek to drink. The day after the water treatment they would go directly to the watering trough and now that is the only water they will drink. Prior to treatment the water tested high in pesticides, herbicides and fertilizers from a nearby orchard. That young family had a baby born with extreme deformity which ended in death and I believe it was from the water they were drinking on a daily basis.**

**Σ In all the dairy farms we treated the contaminated water contained bacteria, parasites, fungus, chemicals and viruses and it was coming straight through into the milk. Once the water was treated, the milk was no longer contaminated. This would hold true for nursing mothers as well.**

**Σ In another case, a woman wanted their well treated but her husband was dragging his feet so their oldest son did it. In the process, he broke a rusty part of the well head. When the husband went to look at the well head a day or two later he found the broken area and pipe as shiny as new. He's a believer now!**

**Σ Another family was watering two horses from a large tub and it took the horses 7 days to drink all that water. After the water treatment the two horses would drink that much water in only 3 days!**

**Σ Another family that raises dogs always had to deal with the green, slimy watering pans. After the treatment, the problem was gone.**

**Σ Another family wanted their well treated but the husband wasn't convinced in spite of telling him story after story until they put a 5 gallon bucket of the water out in the sun for one week, nothing happened no green. So, he said, leave it another week... still nothing. The proof was in the bucket. After they went ahead and treated the well, the neighboring house noticed a change in their well water also. The water traveled the vein and purified their water also!**

**Σ I treated two old farms houses with very old plumbing. The water ran black for 24 hours as it pulled all the garbage off the well casing and pipes They are totally purified now. I have found that, depending on how bad the water source is, it takes anywhere from overnight to up to 5 days to become purified.**

**Σ There were about 5 instances where people were either building new homes or switching from grade B to grade A milk, which requires a state water test. We treated before the state test and in each case they were required to chlorinate before the test and in each case the inspector could find no chlorine even after adding more**

**chlorine over and over again! The water treatment immediately broke down the chlorine!!**

**Σ The worst well I ever treated was full of parasites, bacteria, viruses, fungus, chemicals and metal and tasted of crude oil from a nearby oil well. The oil was leaching into the water vein. It took 5 days to purify that system and there was no more oil taste.**

**Σ One family treated a small swimming pond. The water was purified and it didn't grow algae anymore.**

**Σ A restaurant has to pass a state test every year and they have to chlorinate to pass. After the water treatment they easily pass without chlorine.**

**Σ A farmers draft horses wouldn't drink the well water and instead always went to a pond. Now they only drink well water at the trough.**

**I always tell people that if they don't believe me, believe the animals! You can learn a lot by observing them.**

**I treated a lot of homes that had water purifying systems and I can honestly say their health problems are coming from the water. You are only as healthy as the water you drink and even though they think they have good water because it tastes good, I guarantee it's polluted with something. I have seen it too many times. I find that a one time water treatment is all you need and it seems to last forever, but we don't know for sure.**

**LWM Electron 4 Water Machine --Please Scroll Down for Price and Ordering Information**

## **PRICE AND ORDERING INFORMATION**

**COMPARE WITH A \$1,500 DISTILLER!!**

**Commenting on rising costs, one doctor said: "No price is too high because no product can do what this one DOES!"**

**Σ Each unit is CUSTOM MADE!! Allow 7 days to build your electron machine.**

**ORDER by calling TOLL FREE 1-888-824-7558,  
ALL major credit cards are accepted.**

**The LWM ELECTRON 4, Energized Water Machines produce the best electron energized water.**

**When your health is priceless, you need the best money can buy.**

**Σ The LWM ELECTRON 4 Water Machine makes 1/2 gallon distilled, energized water per hour or up to 12 gallons per day - or up to 200 gallons per day of energized but not distilled water. These machines are hospital-grade stainless steel, small, weigh only six pounds, and travel well. They are sold brand new with a one-year warranty on parts. Please allow one week for manufacture and one weeks for shipping.**

**US Patent numbers 4,612,090 (15 claims)  
and METHOD PATENT 5,203,970  
with other patents pending**

**Σ LWM ELECTRON 4™ Was \$1,995 (Sugg. Retail \$2,195)  
NOW ONLY \$1,700.00 and FREE Shipping in Cont. US. \$25 to HI/AK\***

**A special corning light bulb placed in the airspace above the water line in the boiler creates ozone as air is brought into the boiler 3 times/minute creating higher electron levels with incredible results reported. Unlike an ozonator, the water vapor passes through an ozone layer so the clusters of water molecules can pick up more electrons. Medical data shows these electrons kill viruses, pathogenic bacteria & parasites with astounding reports.**

**Also, water systems must have an AIR GAP (local codes)! INCREDIBLY with present day threats, ordinary distillers, filters, ozonators, reverse osmosis etc. have**

**NONE!! Our patents show that VAPOR MUST PASS AN AIR GAP which produces electron levels 15 times higher! ELECTRONS DESTROY FREE RADICALS!!**

**ELECTRON levels are dangerously low (SciAmer) and we aren't getting enough from water or air. We need these electrons to live (SciAmer) and these patented machines are now the leading edge technology (THE WASHINGTON TIMES and elsewhere) to stop dangerous bacteria! ANY water, except this electron rich water. AFTER it leaves ANY purifier quickly GROWS VIRUSES & BACTERIA when it reaches body temperature, CAUSING problems! ELECTRONS KILL THEM and unlike ANY other water no chemicals are needed in a hot tub because the water CONTINUES TO PURIFY ITSELF WITH ELECTRONS! Any lab that tests water properties can show you why we have NO COMPETITION... with astonishing letters on file!**

**HEALTH IS WEALTH MAUI**

**120 Hana Hwy. #9-305**

**Paia, HI 96779**

**OUTPUT...**

**Makes 1/2 gallon distilled, energized water per hour or up to 12 gallons per day - or up to 200 gallons per day of energized but not distilled water.**

**AIR COOLER WITH STIRRER...**

**so that more oxygen can be consumed during the energizing process.**

**STAINLESS STEEL AIR FILTER**  
It's Automatic-Electric Stainless Steel.

**You can TAKE IT ANYWHERE**  
The basic machine without the air cooler weighs  
**ONLY FOUR POUNDS** and with the air cooler only 6 pounds!

**Unmatched by any product in the world!**

**MAGIC BOILER ACTION...**  
With easy snap apart **HEATER MODULE 1500 Watts**-plugs in like a toaster! We use **Only U.L. APPROVED THERMOSTATS.**

**FAUCET DIVERTER VALVE...**  
No need to hand-fill the machine! Just attach to your faucet, pull the diverter valve and your new water machine will fill automatically.

**Protected by United States and Foreign Patents! PROTECTED BY FOREIGN and UNITED STATES PATENTS 4,612,090 (15 claims) - METHOD PATENT 5,203,970 and patents pendings. Read More about distillers below.**

## **ORDINARY WATER DISTILLERS ARE A JOKE!!!**

**Ordinary Distillers are nothing more than moonshine stills and should not be used for a number of reasons:**

- 1. Instead of removing volatile organic chemicals (VOC's) and inorganic chemicals, they concentrate them!**
- 2. They waste electricity, because the raw water is put directly into the boiler; So, the only way for pollutants to get out of ordinary distillers is through their coil. This means you drink them.**
- 3. Ordinary distillers through constant heating of the water, drive off all electrons and create dead water.**
- 4. Ordinary distillers produce a water that is about a 2 on the pH scale of 1-14 with 1 being the most acid and 14 being the most alkaline. This means that it is acid water. Ideally healthy water should be neutral, which is exactly what you get from the Living Water Machine, a pH of 6.8-7.**

**The Living Water Machine is a far superior technology. It preheats the water using heat from the condenser. Next, it drives the preheated water down into a vortex with a lot of oxygen to strip out the organics before the water even goes into the boiler. Once it is in the boiler, as noted earlier, the water is recycled about 400 times for every gallon of water that you distill!**

**Unlike ordinary stills that are large, cumbersome and cost around \$1500, the Living Water Machine are small, compact units that are great for home or travel use and they are low cost considering that they are made of durable stainless steel.**

**Ordinary stills produce water that you wouldn't even want if you understand the distillation process! They are only a little better than other water purification products that are readily available.**

**The worst water is probably bottled water because of the lack of industry standards and the fact that viruses, parasites and bacteria are frequently a problem!**

**Also Super viruses, parasites and bacteria have learned to survive anything but intense heat!**
