

## OUTSTANDING PERFORMANCE

Multi-Pure Drinking Water Systems have been extensively tested according to NSF/ANSI Standards and certified by NSF International.

Multi-Pure filters reduce contaminants as follows:

**By mechanical filtration:**

Cysts (Giardia, Cryptosporidium, Entamoeba, Toxoplasma)  
Asbestos

Turbidity

Particulate Matter, Class 1 down to 0.5 micron

**By Adsorption:**

Chloramine Chlorine  
Chlordane Lead  
Mercury MTBE  
Toxaphene PCBs  
Volatile Organic Chemicals (listed below)

Alachlor	Halacetoneitriles (HAN):
Atrazine	bromochloroacetonitrile
Benzene	dibromooacetonitrile
Bromodichloromethane (THM)	dichloroacetonitrile
Bromoform (TTHM)	trichloroacetonitrile
Carbofuran	Haloketones (HK):
Carbon Tetrachloride	1,1-dichloro-2-propanone
Chlorobenzene	1,1,1-trichloro-2-propanone
Chloroform (TTHM)	Heptachlor
Chloropicrin	Heptachlor Epoxide
2,4-D	Hexachlorobutadiene
Dibromochloromethane (THM)	Hexachlorocyclopentadiene
Dibromochloropropane (DBCP)	Lindane
o-Dichlorobenzene	Methoxychlor
p-Dichlorobenzene	Pentachlorophenol
1,2-Dichloroethane	Simazine
1,1-Dichloroethylene	Styrene
cis-1,2-Dichloroethylene	1,1,2,2-Tetrachloroethane
trans-1,2-Dichloroethylene	Tetrachloroethylene (PCE)
1,2-Dichloropropane	Toluene
cis-1,3-Dichloropropylene	2,4,5-TP (silvex)
Dinoseb	Tribromoacetic acid
Endrin	1,2,4-Trichlorobenzene
Ethylbenzene	1,1,1-Trichloroethane
Ethylene Dioxide	1,1,2-Trichloroethane
(EDB)	Trichloroethylene (TCE)
	Trihalomethanes (THMs)
	Xylenes (total)

The list of contaminants that Multi-Pure reduces does not mean that these substances are present in your tap water. Copy of ULg and NSF listings available upon request. Be sure to check for compliance with state and local laws and regulations. Claims of capacity are not applicable to contaminants reduced by mechanical filtration because of broad variations in the quality and quantity of physical matter in your drinking water.

## THE MULTI-PURE DRINKING WATER SYSTEM

The Exclusive Multi-Pure Design Has Been Certified, Registered or Listed By:

NSF International

California Department of Health Services

Iowa Department of Public Health

State of Wisconsin, Bureau of Building Water Systems, Research & Products Review Unit

State of Massachusetts, Board of Plumbing

State of Colorado, Department of Health, Drinking Water Program

EPA Establishment No. 074784-NV-001

## DRINK WATER FOR GOOD HEALTH

For healthier living, health experts recommend that you drink about eight glasses of water every day.

Drinking refreshing, clear water plays a major role in reducing the risk of certain diseases. Water helps keep your muscles and skin toned, assists in weight loss, transports oxygen and nutrients to the cells, eliminates toxins and wastes from the body, and regulates body temperature.

Maintaining good health and proper hydration is easier with a Multi-Pure Drinking Water System because the water tastes great!

## THE MARKET LEADER IN HIGH PERFORMANCE

Since 1970, Multi-Pure Corporation has been the market leader in high performance drinking water systems.

Its founders had the far-sighted vision of the need for a drinking water treatment device to improve the quality of tap water in your home.

Today, Multi-Pure is an industry leader and the world's largest manufacturer of compressed carbon block cartridges and drinking water systems utilizing its technologically advanced filters.

## WHY MULTI-PURE IS PREFERRED!

### THE BENEFITS OF MULTI-PURE

- Provides delicious, clear, healthier drinking water.
- Improves the taste of beverages - coffee, tea, juices, and drinks of all kinds.
- Improves the taste and quality of ice.
- Provides high-quality water for food preparation and cooking.
- Improves the quality of water for use in mixing infant formula.
- Provides healthier water for your pets.
- Easy and convenient to use; provides wonderfully delicious water right at your kitchen or bathroom sink.
- At only 7 cents per gallon, filters are affordable and easy to replace.
- Costs much less than bottled water.
- Tested according to NSF/ANSI Standards and certified by ULg and NSF International.

### WHY MULTI-PURE IS THE BEST CONSUMER VALUE IN WATER FILTRATION!

#### EFFECTIVE

- ✓ Reliable protection for your family's drinking water.
- ✓ Beneficial minerals remain in the water.
- ✓ Nothing harmful is added to the water.

#### CONVENIENT

- ✓ Variety of models - below the sink or countertop, stainless steel or plastic.
- ✓ Portable units for apartments, travel, or emergency use.
- ✓ Easy to install.

#### ECONOMICAL

- ✓ Filter replacement about once a year.
- ✓ Low maintenance cost.
- ✓ Variety of units available to suit any budget.

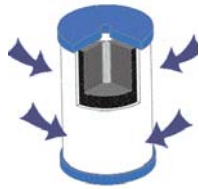

#### GUARANTEED QUALITY

- ✓ 25 year warranty on the housing.
- ✓ 1 year warranty on the accessories.
- ✓ 30 day money-back guarantee.
- ✓ Toll-free customer service.

## HOW MULTI-PURE'S SOLID CARBON BLOCK FILTERS WORK

Multi-Pure Drinking Water Systems produces one of the most effective carbon block water filters available on the market. Multi-Pure Drinking Water Systems give you peace of mind by letting you control the quality of the water you drink. When comparing Multi-Pure's technologically advanced filtration capabilities with other filters, you will find that the performance of the Multi-Pure System is superior. Multi-Pure Drinking Water Systems meet the high standards and needs of more than three million satisfied customers throughout the world, and they will meet your requirements and high expectations.

**MULTI-PURE FILTERS** provide the most efficient contaminant removal possible. Contaminants with a physical size are removed as water passes through the pre-filter which acquires a positive molecular charge attracting the negative ions of contaminants. Then, the water passes through the densely compacted carbon block filter micro-straining every molecule of water through microscopic pores.

The compacted carbon block filter has a large surface area for chemical/physical adsorption to take place. With solid carbon block, the water contact time is longer and provides for greater adsorption of many different chemicals, pesticides, herbicides and certain heavy metals.

The filter is replaceable and can easily be changed. Filters should be replaced annually or sooner if needed. Filter life will vary in proportion to the amount of water used and the level of impurities in the water being processed.

## SAVE MONEY OVER BOTTLED WATER!

Switch from bottled water to a Multi-Pure Drinking Water System and do away with:

- ✓ High Costs
- ✓ Storage
- ✓ Possible Contamination
- ✓ Plastic Bottles in Landfills
- ✓ Inconvenience
- ✓ Water Rationing

### MULTI-PURE VS. BOTTLED WATER COSTS COMPARE AND SAVE!

Multi-Pure Drinking Water Systems	7¢ per gal.
Pitchers/Carafes	20¢ per gal.
Water Vending Machine	25¢ per gal.
Home Delivered Bottled Water	\$1.74 per gal.
Domestic "Purified" Bottled Water	\$2.23 per gal.
Imported Bottled Water	\$3.84 per gal.

Costs are averaged, based on several different brands of bottled water.  
\*Complete cost comparison analysis available on request

### Replaceable filters are affordable

**CB6**  
Replacement Filter  
for stainless steel models  
(7¢/gal)  
**\$49.95 plus tax and S&H**

**CB5**  
Replacement Filter  
for plastic models  
(10¢/gal)  
**\$39.95 plus tax and S&H**

Made In The U.S.A.

#### MP750SB

- Below Sink Installation
- May be connected to icemaker
- Durable stainless steel housing
- Filter life up to 750 gallons or 12 months
- Specially designed stainless steel drinking water faucet
- May be converted to countertop unit with purchase of conversion kit
- Includes easy connect fittings for quick installation

**\$379.95 plus tax, S&H**

#### MP1200EL

- Below Sink Installation
- May be connected to icemaker
- Capacity-metered, stainless steel faucet indicates when filter should be changed
- Durable stainless steel housing
- Filter life up to 1,200 gallons or 12 months
- Includes easy connect fittings for quick installation

**\$459.95 plus tax, S&H**

#### MP750SI

- Inline system for refrigerators, water coolers, or restaurants where all water to a cold water outlet or faucet is filtered
- Includes easy-connect fittings
- Durable stainless steel housing
- Filter life up to 750 gallons or 12 months

**\$324.95 plus tax, S&H**

#### MP750SC

- Countertop use
- May be converted to below sink by purchasing conversion kit
- Durable stainless steel housing
- Stainless Steel spout
- Filter life up to 750 gallons or 12 months
- Hose & diverter valve assembly attached to unit connects to your faucet

**\$359.95 plus tax, S&H**

#### MP750SSCT

- Countertop use only
- Durable stainless steel housing
- Stainless Steel Spout
- Filter life up to 750 gallons or 12 months
- Hose & diverter valve assembly attached to unit connects to your faucet

**\$289.95 plus tax, S&H**

#### MP400PC

- Countertop use only
- Durable high impact ABS plastic housing
- Stainless Steel spout
- Filter life up to 400 gallons or 12 months
- Hose & diverter valve assembly attached to unit connects to your faucet

**\$199.95 plus tax, S&H**

Photos not to scale: Stainless Steel Units are 9.4" x 6". Plastic Unit is 7.25" x 6".
